

Continuous improvement and efficient processes in companies

20+ years of experience

I have extensive experience with the implementation of LEAN principles and continuous process improvement in companies.

Different sectors

I specialize in automotive, packaging, service and manufacturing companies where I apply my LEAN knowledge.

19 countries

I have applied my knowledge and skills in projects across 19 countries, giving me a unique international perspective.

Flexible projects

I offer 1-12 month projects focused on building company culture, savings and crisis / interim problem solving.

Ivan Rehak

LEAN & Operational Excellence consultant
Trainer/ Mentor/ Interim manager

Why LEAN / Interim with Rehaki

Key achievements

- Implementing LEAN: Successful projects that increase efficiency and reduce costs
- Increase in OEE by 15% and avoidance of investment in new machinery of EUR 2 million
- Up to 98% increase in productivity and up to 80% reduction in scrap at automotive suppliers

Reasons to cooperate

- Proven expertise: more than 20 years of experience with continuous improvement and LEAN methodologies in various industries
- Problem solving: specialising in production stability, improving communication and solving quality problems

Identified challenges

- Frequent supply chain disruptions and logistical problems
- Inconsistent quality control leading to customer dissatisfaction
- Ineffective meetings and poor internal communication and delegation of authority
- High staff turnover, inefficient level of training

Services and expertise

1

Lean manufacturing audits

Complex evaluation of manufacturing processes and identification of opportunities for improvement using LEAN principles.

2

Lean Six Sigma tool training

Practical workshops and training focused on the implementation and use of Lean Six Sigma tools in practice.

3

Mentoring

Individual support and guidance to members of management to develop their LEAN management and continuous improvement skills.

4

Interim & Crisis Management

Quick and effective solution of crisis situations in companies using LEAN methodologies and tools.

LEAN training

4 principles and 7 concepts of Lean	5S	8 types of waste
Brainstorming	Building a Kaizen Culture	Material flow mapping
OEE	Overview of lean manufacturing	Problem Solving - 5x Why, Fishbone
SMED	Spaghetti Chart	Standardised work
Lean Manufacturing - VA/ NVA	TPM	U cell
Value Stream Mapping	Process variability - Cp, Cpk	

Trainings for managers

Leadership

Leadership development and effective team management in the context of LEAN principles.

Motivation

Techniques and strategies to increase employee motivation and engagement in the continuous improvement process.

Teamwork

Building effective teams and improving collaboration within the organisation.

Facilitation

Developing skills for effective workshop facilitation and group process facilitation.

Reference

Morten Just Blangsted, Partner (Valcon, 2023 - 2024)

"Ivan has a winning attitude and has been able to improve not only OTIF but also OEE and quality. He knows his lean tools, knows how to set them up, train and implement them at the customer site. He is quick in thinking, but also patient in training and coaching executives.

A very capable consultant."

2

Michal Vychodil, Head of PwC Academy (2023-2025)

"We at PwC Academy are delighted that Ivan is able to translate his practical experience and expertise into engaging Lean Six Sigma training. His energy and enthusiasm for LSS is motivating and much appreciated by our clients/students. Thank you :)"

3

Jan Pleyer, Plant Director (Auria Solutions, 2020 - 2022)

"He is full of energy and enthusiasm. A good team member and part of the company culture (builder). His know-how in production is perfect and he works hard on his technical skills. He has a clear LEAN mindset.

👍 "

4

Rainer Fellenz, Vice President Operations (Auria Solutions, 2020 - 2022)

"He is a motivated, forward-thinking and analytical manager with an impressive knowledge of continuous improvement and lean manufacturing. He was respected by colleagues and customers alike. Ivan is dedicated, motivated, ready to tackle difficult challenges and determined to implement solutions. His leadership and organizational skills have been an asset to my team."
